

# FOOD DELIVERY BANGALORE

Exploratory SQL analysis of 2,988 food delivery orders across Metropolitan, Urban & Semi-Urban Bangalore

## KEY METRICS

**2,988**

TOTAL ORDERS

**26 MIN**

AVG DELIVERY TIME

**4.64**

AVG RIDER RATING

**29%**

LATE DELIVERY RATE

## BUSINESS INSIGHTS

### TRAFFIC IMPACT

**Jam traffic** causes the highest average delivery time of **30.61 min**, while Low traffic is just 21.50 min.

### WEATHER DELAYS

**Cloudy (28.68 min)** & Foggy (28.28 min) weather conditions increase delivery times most. Sunny weather is fastest at 21.87 min.

### CITY PERFORMANCE

**Semi-Urban** areas have the highest avg delivery time (~50 min). Metropolitan has the most orders at **2,300**.

### FESTIVAL EFFECT

Orders during festivals average **44.41 min** vs 25.81 min on normal days — a **72% surge** in delivery time.

### BEST VEHICLE

**Scooters (24.21 min)** outperform motorcycles (27.40 min) despite motorcycles handling the most deliveries (1,764).

### DISTANCE FACTOR

Deliveries over **15 KM** average 30.17 min vs 22.31 min for under 5 KM — distance is a direct time driver.

## DATA BREAKDOWN

### ORDERS BY CITY TYPE

|              |      |
|--------------|------|
| Metropolitan | 2300 |
| Urban        | 677  |
| Semi-Urban   | 11   |

### ORDERS BY VEHICLE

|            |      |
|------------|------|
| Motorcycle | 1764 |
| Scooter    | 1003 |
| E-Scooter  | 221  |

### AVG TIME BY TRAFFIC

|        |       |
|--------|-------|
| Jam    | 30.61 |
| High   | 27.62 |
| Medium | 26.45 |
| Low    | 21.50 |

### RATING VS DELIVERY TIME

|           |       |
|-----------|-------|
| Excellent | 24.19 |
| Good      | 34.35 |
| Average   | 35.94 |

## FEATURED QUERY

```
-- Q1: Traffic Condition vs Delivery Time
SELECT Road_traffic_density,
       ROUND(AVG(delivery_time_mins), 2) AS AVERAGE_TIME
FROM food_delivery
GROUP BY Road_traffic_density
ORDER BY AVERAGE_TIME DESC;

-- Result: Jam → 30.61 min | High → 27.62 | Medium → 26.45 | Low → 21.50
```

First we check NULL values in column.

```
3 • use food_delivery;
4
5   -- Check Null Values --
6
7 • select * from food_delivery
8   where city is null;
9
10  -- Count Missing Cities --
11
12 • select count(*) from food_delivery
13   where city = 'Nan';
14
```

```
15   -- Check the Percentage of Null or NaN values --
16 • SELECT
17   ROUND(
18     COUNT(CASE WHEN City='NaN' THEN 1 END) * 100.0 / COUNT(*),
19     2
20   ) AS missing_percentage
21   FROM food_delivery;
22   -- We have 3.08 % of null values so we can change the Mode for City Column --
```

The screenshot shows a database interface with a 'Result Grid' tab. The grid has one column labeled 'missing\_percentage' and one row with the value '0.00'. There is a 'Filter Rows' input field to the right of the grid.

|   | missing_percentage |
|---|--------------------|
| ▶ | 0.00               |

We have 3.08 % of null values so we can change the Mode for City Column.

## Replacing with mode

```
24 -- Replacing With Mode in City Column --
25
26 • SET SQL_SAFE_UPDATES = 0;
27
28 • UPDATE food_delivery
29   SET City = 'Metropolitian'
30   WHERE City = 'NaN';
31 # Missing values in City (3.08%) were replaced with the mode (Metropolitian).
```

Missing values in City (3.08%) were replaced with the mode (Metropolitian).

```
33 • UPDATE food_delivery
34   SET Festival = 'No'
35   WHERE Festival = 'NaN';
36
```

Some values in Festival column have NaN values so I change with No.

## Total Orders

```
37      -- EXPLORATORY SQL ANALYSIS --
38
39      # 1 . Total Orders
40
41 •    SELECT COUNT(*) AS TOTAL_ORDERS
42      FROM food_delivery;
43      # Company processed 2988 orders.
44
```

| Result Grid |              | Filter Rows: |
|-------------|--------------|--------------|
|             | TOTAL_ORDERS |              |
| ▶           | 2988         |              |

Company Processed 2988 Orders.

## Average Delivery Time

```
45      # 2 Average Delivery Time
46
47 •    SELECT AVG(DELIVERY_TIME_MINS) AS Average_Delivery_Time
48      FROM food_delivery;
49      #Average delivery time is around 26 minutes.
50
```

| Result Grid |                       | Filter Rows: |
|-------------|-----------------------|--------------|
|             | Average_Delivery_Time |              |
| ▶           | 26.1319               |              |

Average Delivery Time is around 26 minutes.

SQL

### Average Rider Rating

```
51 # 3 Average Rider_Rating
52
53 • SELECT AVG(Delivery_person_Ratings) AS Average_Rider_Rating
54 FROM food_delivery;
55 # Average Rider Rating 4.6
```

| Result Grid |                      | Filter Rows: |
|-------------|----------------------|--------------|
|             | Average_Rider_Rating |              |
| ▶           | 4.633935742971885    |              |

### Orders By City

```
57 # 4 Orders By City
58
59 • SELECT CITY , COUNT(*) AS Orders FROM food_delivery
60 GROUP BY CITY
61 ORDER BY Orders DESC;
62 # Most orders come from Metropolitan cities.
```

| Result Grid |              | Filter Rows: |
|-------------|--------------|--------------|
|             | CITY         | Orders       |
| ▶           | Metropolitan | 2300         |
|             | Urban        | 677          |
|             | Semi-Urban   | 11           |

Most orders come from Metropolitan cities.

## By Vehicle Type

```
64 # 5 Orders by Vehicle Type
65
66 • SELECT Type_of_vehicle , COUNT(*) AS Orders
67 FROM FOOD_DELIVERY
68 GROUP BY Type_of_vehicle
69 ORDER BY Orders DESC;
70 # Motorcycles handle most deliveries.
```

| Type_of_vehicle  | Orders |
|------------------|--------|
| motorcycle       | 1764   |
| scooter          | 1003   |
| electric_scooter | 221    |

Motorcycles handle most deliveries.

## By Traffic Density.

```
72 # 6 Orders by Traffic Density
73
74 • SELECT ROAD_TRAFFIC_DENSITY , COUNT(*) AS Total_Orders
75 FROM food_delivery
76 GROUP BY ROAD_TRAFFIC_DENSITY
77 ORDER BY TOTAL_ORDERS DESC;
78 # Low and Jam traffic dominate deliveries.
```

| ROAD_TRAFFIC_DENSITY | Total_Orders |
|----------------------|--------------|
| Low                  | 1050         |
| Jam                  | 942          |
| Medium               | 714          |
| High                 | 282          |

Low and Jam traffic dominate deliveries.

## Which Traffic Condition Causes Maximum Delivery Time?

```
80      --          BUISNESS QUESTIONS          --
81
82      # Q1. Which Traffic Condition Causes Maximum Delivery Time?
83
84 •  SELECT Road_traffic_density,
85         ROUND(AVG(delivery_time_mins),2) AS AVERAGE_TIME
86      FROM food_delivery
87      GROUP BY Road_traffic_density
88      ORDER BY AVERAGE_TIME DESC;
89      # Jam traffic produces the highest delays.
```

| Result Grid |                      |              | Filter Rows: | Export: |
|-------------|----------------------|--------------|--------------|---------|
|             | Road_traffic_density | AVERAGE_TIME |              |         |
| ▶           | Jam                  | 30.61        |              |         |
|             | High                 | 27.62        |              |         |
|             | Medium               | 26.45        |              |         |
|             | Low                  | 21.50        |              |         |

Jam traffic produces the highest delays .

Which weather condition causes delays?

```
91 # Q2. Which Weather Condition Causes Delays?
92
93 • SELECT WEATHER_CLEAN , ROUND(AVG(DELIVERY_TIME_MINS),2) AS AVERAGE_TIME
94 FROM food_delivery
95 GROUP BY WEATHER_CLEAN
96 ORDER BY AVERAGE_TIME DESC;
97 # Cloudy and Foggy weather increase delivery time.
98
```

| Result Grid |               |              | Filter Rows: | Export: |
|-------------|---------------|--------------|--------------|---------|
|             | WEATHER_CLEAN | AVERAGE_TIME |              |         |
| ▶           | Cloudy        | 28.68        |              |         |
|             | Fog           | 28.28        |              |         |
|             | Sandstorms    | 26.10        |              |         |
|             | Windy         | 25.99        |              |         |
|             | Stormy        | 25.83        |              |         |
|             | Sunny         | 21.87        |              |         |

Cloudy & Foggy weather increases delivery time.

## Top 10 Fastest delivery partners .

```
99  # Q3. Top 10 Fastest Delivery Partners.
100
101 • SELECT DELIVERY_PERSON_ID , ROUND(AVG(DELIVERY_TIME_MINS),2) AS AVERAGE_TIME
102 FROM food_delivery
103 GROUP BY DELIVERY_PERSON_ID
104 ORDER BY AVERAGE_TIME
105 LIMIT 10;
106
```

| DELIVERY_PERSON_ID | AVERAGE_TIME |

| BANGRES12DEL03     | 4.64           |
| BANGRES03DEL02     | 4.64           |
| BANGRES07DEL01     | 4.64           |
| BANGRES04DEL03     | 4.63           |

## Distance vs Delivery Time .

```
117 • SELECT
118 CASE
119 WHEN distance_km <= 5 THEN '0-5 KM'
120 WHEN distance_km <= 10 THEN '5-10 KM'
121 WHEN distance_km <= 15 THEN '10-15 KM'
122 ELSE '15+ KM'
123 END AS distance_range,
124 ROUND(AVG(delivery_time_mins),2) AVERAGE_TIME
125 FROM food_delivery
126 GROUP BY distance_range
127 ORDER BY AVERAGE_TIME DESC;
128 # Longer distances directly increase delivery time.
```

| Result Grid |                |              | Filter Rows: | Export: |
|-------------|----------------|--------------|--------------|---------|
|             | distance_range | AVERAGE_TIME |              |         |
| ▶           | 15+ KM         | 30.17        |              |         |
|             | 10-15 KM       | 29.65        |              |         |
|             | 5-10 KM        | 23.86        |              |         |
|             | 0-5 KM         | 22.31        |              |         |

Longer distances directly increase delivery time.

Is Festival Impact on deliveries ?

```
130 # Q6. Festival Impact
131
132 • SELECT FESTIVAL , AVG(DELIVERY_TIME_MINS) AS AVERAGE_TIME
133 FROM food_delivery
134 GROUP BY FESTIVAL
135 ORDER BY AVERAGE_TIME DESC
136 ;
137 # Deliveries take longer during festivals.
138
```

|   | FESTIVAL | AVERAGE_TIME |
|---|----------|--------------|
| ► | Yes      | 44.4118      |
|   | No       | 25.8144      |

Yes , during festivals deliveries take longer time.

Which order type takes more time ?

```
139 # Q7. Which Order Type Takes More Time?
140
141 • SELECT
142     TYPE_OF_ORDER,
143     ROUND(AVG(DELIVERY_TIME_MINS), 2) AS AVERAGE_TIME
144 FROM
145     food_delivery
146 GROUP BY TYPE_OF_ORDER
147 ORDER BY AVERAGE_TIME DESC
148 ;
```

|   | TYPE_OF_ORDER | AVERAGE_TIME |
|---|---------------|--------------|
| ► | Meal          | 26.62        |
|   | Buffet        | 26.30        |
|   | Drinks        | 25.93        |
|   | Snack         | 25.69        |

SQL

## Late delivery Percentage.

```
150 # Q8. Late Delivery Percentage
151
152 • SELECT
153     ROUND(SUM(IS_LATE) / COUNT(*), 2) AS LATE_DELIVERY_PCT
154 FROM
155     FOOD_DELIVERY;
156 # Overall late delivery rate.
157
```

| Result Grid |                   | Filter Rows: | Export: |
|-------------|-------------------|--------------|---------|
|             | LATE_DELIVERY_PCT |              |         |
| ▶           | 0.29              |              |         |

Overall Late delivery rate .

## City - Wise Delivery Performance .

```
158 # Q9. City-wise Delivery Performance
159
160 • SELECT
161     CITY, AVG(DELIVERY_TIME_MINS) AS AVERAGE_TIME
162 FROM
163     FOOD_DELIVERY
164 GROUP BY CITY
165 ORDER BY AVERAGE_TIME DESC
166 ;
167 # Semi-Urban has highest Average delivery time which is 50 min approx.
168
```

| Result Grid |              | Filter Rows: | Export: |
|-------------|--------------|--------------|---------|
|             | CITY         | AVERAGE_TIME |         |
| ▶           | Semi-Urban   | 50.1818      |         |
|             | Metropolitan | 26.9943      |         |
|             | Urban        | 22.8109      |         |

Semi – Urban has Highest Average Delivery Time which is 50 Min Approx.

## Best Vehicle Type .

```
169 # Q10. Best Vehicle Type
170
171 • SELECT
172     Type_of_vehicle,
173     ROUND(AVG(delivery_time_mins), 2) AVERAGE_TIME
174 FROM
175     food_delivery
176 GROUP BY Type_of_vehicle
177 ORDER BY AVERAGE_TIME;
178 # SCOOTER AND ELECTRIC SCOOTER ARE LESS AVERAGE TIME WHILE MOTORCYCLE TAKE MORE TIME.
179
```

| Result Grid |                  |              | Filter Rows: | Export: |
|-------------|------------------|--------------|--------------|---------|
|             | Type_of_vehide   | AVERAGE_TIME |              |         |
| ▶           | scooter          | 24.21        |              |         |
|             | electric_scooter | 24.70        |              |         |
|             | motorcycle       | 27.40        |              |         |

Scooter and Electric Scooter are less average time while Motorcycle take more time.

## Riders by Ranking .

```
